## About me

Self-taught programmer for 6 years. Passionate about learning new techniques and languages. Actually, focused in **MERN stack**. Whenever I can, I try to optimize and automate all the processes that are in my hand. My hobby is programming everything I can think of and I have a high capacity for analysis and problem solving.

## Education

### Certificated in deep learning & CUDA

2021-2021 - University of Malaga

### Expert in reverse engine and malware intelligence

2021-2021 - University of Malaga

### Cybersecurity master

2020-2021 - Valencian International University

### Web Application Development

2017-2019 - High School Severo Ochoa

### Microcomputer systems and networks

2015-2017 - High School Severo Ochoa

## Professional Experience

### //FRONTEND DEVELOPER AND BUG FIXER

2023 - Present, Copernicus S.L.

Develop and maintenance of the internal web application with **React and Typescript**. Daily and weekly coordinance with the entire team. Daily use of **Git**.

### //SOFTWARE DEVELOPER

2018 - Present On (Time)

-Skyminers / **React, NextJS, NodeJS, Solidity**  
-Wildprint S.L. / **React, Firebase, Tailwind**  
-Krebor Technology S.L. / **React, Firebase, Tailwind, Typescript**  
-jebx.dev / **React, Firebase, Tailwind, Vite, Typescript**  
-A.M.P.A / **PHP, Wordpress**  
-Krebor Technology S.L. / **C#, SQLite, WPF**

4 years of personal and autonomous development. Knowledge in more than 35 technologies, languages and frameworks. Good practices, use of interfaces, classes, enums, etc.. Knowledge in **git, jira, SOLID principles, hexagonal architecture**. Habituated to do **sprints** and follow the **Scrum** process. Fullstack develop with **MERN stack** tendency. Passionate about find bugs and optimize everything. I have do the entire develop of +10 websites and writed a lot of scripts and bots. Facility with **requests manage, sessions, JSONs, sockets, async functions and multithreading**. I have analyzed malware and i know obfuscation techniques

### //FRONTEND DEVELOPER AND BUG FIXER

2022 - 2022, NTT DATA - Jazztel

Develop and maintenance of the Jazztel's Website with **Angular and NodeJS**. Daily and weekly coordinance with some teams and direct interlocution with the client. Daily use of **Jenkins, Jira and Git**. In addition, i was mandated to find and solve bugs in the testing servers.

### //FRONTEND DEVELOPER

2020 - 2020, MBVR

I was head of frontend development for a startup related to security against Covid-19. Development started with **C# and Blazor** but we ended up migrating to **C# and React (Redux + SemanticUI)**. Weekly meetings with the back team. I was also in charge of adding security to the network and to the intraconnections (**JWT, encryption, etc.**).

### //RPA SOFTWARE DEVELOPER

2019 - 2019, Accenture - Movistar

Development and improvement of Movistar's internal software. Use of **Blueprism** to automate the processes carried out by the customer service team and in stores. I improved some of these softwares by performing **web scrapping** with the use of **HTTP requests** and thus optimizing the execution speed x5.
